Functional Requirements

REQ1 The user must be able to create his own account with first name, last name and avatar to be able to save movies, personalizations and save settings

REQ2 On the main page, the user should see, in addition to the title of the film, the cover of the film so that the films are visually different

REQ3 On the main page, the user should see movies by category - so that the user can more easily find the genre of the movie he needs. For example: Comedy, Action

REQ4 Each movie should have a save icon so that the user can save the movie for later viewing.

REQ5 Every movie should have a Thriller so that the user can have a brief look at the plot of the movie

REQ6 The main page should have filtering by Reviews, Comments, Date, Views - to make it easier to find a movie

REQ7 The header of the site should have functional buttons: Home. Movies. Series. Save

REQ8 There should be a functional search icon in the header of the site so that the user can find a movie by name.

REQ9 The site's media player should have buttons: Pause/Continue, rewind 15 seconds, volume, progress bar, to control the media player/watch a movie on the site

Netflix

REQ10 Each movie must have information about the name of the film, reviews, description of the film, genre, and author's composition - for complete information about each film and compliance with copyright. Test Cases

TC1 Create a user account with valid data

TC2 On the main page, find the movie (Titanic) by its cover

TC3 Check the functionality of the filter - categories. Select each filter and check the result

TC4 Add to saved - movie (Titanic)

TC5 Remove movie from saved

TC6 Play the movie thriller (Titanic)

TC7 Apply the review filter on the main page

TC8 Apply a comment filter on the main page

TC9 Go to the tab - Serials.

	TC10 Check the functionality of the media player - add, reduce the sound, rewind for 15 seconds, pause
Netflix	TC11 Check the Titanic movie for availability: movie description, genre, cast, commentators, review, rating
